The ◉ Copilot family

Productivity
- **Windows** — AI in the OS
- **Edge** — AI in the Browser
- **Intune + Security** — AI to secure and provide best practices
- **Apps for Enterprise** — AI for your Microsoft 365 Desktop apps
- **Web Apps** — AI for Microsoft 365 Cloud Services

Business
- **Viva** — AI for User interaction
- **Dynamics** — AI for Sales Teams
- **Service** — AI for Customer Interaction
- **Finance** — AI for ERP Integration

Development
- **Power Platform** — AI for no code development
- **Fabric** — AI for data and reporting
- **Studio** — AI for Interactive Chat Solutions
- **GitHub** — AI for full code development
- **AI Builder** — AI for Azure Open AI apps

As you look to apply AI to your workforce, think about the **personas** / **skills** in your workforce that can benefit from its use

CHRIS BLACKBURN

Skills	Scenario	Solution
Productivity	Rapid search for public information	Copilot for Windows, Copilot for Edge
	Creative generation of graphics	Copilot for Windows, Copilot for Edge
	Voice, Text & Image Interaction	Copilot for Windows
	Navigation in Apps & Features	Copilot for Windows
	Automated Data Analysis	Copilot for Microsoft 365
	Efficient Email Management	Copilot for Microsoft 365
	Improved document creation	Copilot for Microsoft 365
	Efficient and automated threat intelligence and response	Copilot for Security
	Incident management insights	Copilot for Security
	Security response based on client / partner knowledge base	Copilot for Security
	Security response based on custom plugin	Copilot for Security
	Tailored device insights for organizational needs	Copilot for Intune
	Quick analysis of endpoint errors	Copilot for Intune
	Natural language guidance for configuring policies	Copilot for Intune
Business	AI-powered employee engagement for navigating work/life	Copilot for Viva
	AI-powered insights for aiding HR decision-making processes	Copilot for Viva
	Automatically summarize goals	Copilot for Viva
	Automate collection of OKRs	Copilot for Viva
	Streamline processes to work and close deals	Copilot for Sales
	Personalize customer interactions quicker	Copilot for Sales
	Spend less time on meeting prep & emails	Copilot for Sales
	Reinvest time into work task than admin tasks	Copilot for Sales
	Quickly review data sets for anomalies, risks and unmatched values in Excel	Copilot for Finance
	Simplifies the reconciliation process in Excel	Copilot for Finance
	Provides a complete summary of relevant customer account details	Copilot for Finance
	Turn raw data in Excel into presentation-ready visuals and reports	Copilot for Finance
	AI integration with CRM platforms like ServiceNow and Salesforce	Copilot for Service
	Empower your support team with a generative AI infused agent	Copilot for Service
Development	Automatic creation of flows and low code applications	Copilot for Power Platform
	Build low code apps more efficient with intelligent suggestions	Copilot for Power Platform
	Streamlined tasks like notifications, syncing files, collecting data	Copilot for Power Platform
	Perform multiple complex automations across platforms	Copilot for Power Platform
	Speed up data prep and integration using generative AI and natural language	Copilot for Fabric
	Build machine learning model for predictive insights quickly	Copilot for Fabric
	Generate PowerBI reports quickly using natural language	Copilot for Fabric
	Create no-code FAQ chatbots from multiple sources	Copilot Studio
	Expedite app development and integration with data sources	Copilot Studio
	Intelligent code suggestions as you type	Github Copilot
	Correction of coding syntax and running terminal commands in real-time	Github Copilot
	Generate automated pull request summaries	Github Copilot
	Generate commit message generation for changes made	Github Copilot
	Full code development of building for LLM-related applications	Azure OpenAI Builder
	Multi-modality support to build image, text, speech & video apps	Azure OpenAI Builder
	Leverage vector database (Azure AI Search) for LLM creation	Azure OpenAI Builder
